

Still manually reaching out to your Instagram audience?

We are here to improve your brand's outreach experience by delivering a seamless live dashboard via which you can automate Instagram user interactions (follow, like, comment)

.....

Targeted audience outreach

Our algorithms only target peers with certain interests or from a specific auditory.

.....

Guaranteed account safety

Each account has it's own dedicated residential IP. The automated processes are enforced by authentication cookies to make sure your account doesn't get restricted.

.....

Manage multiple business accounts from one place

You can login with multiple Instagram accounts and manage all of them from one single admin dashboard.

.....

Deliverables

Our goal for this semester is to create a fully functional dashboard (frontend & backend) where a user can manage his Instagram account's automation
