FONTY'S ISSD BI DASHBOARD

Insight@ps

A redesign for data-driven clarity across campuses for efficient inventory & lending visibility at Fontys ISSD.

Fonty/s ISSD **oversees lending IT products** that the ICT students and employees may need to progress in their studies and professional tasks in all ICT locations; R10, TQ, and Tilburg.

THE CLIENT:

PROBLEMS IN THE CURRENT SYSTEM:

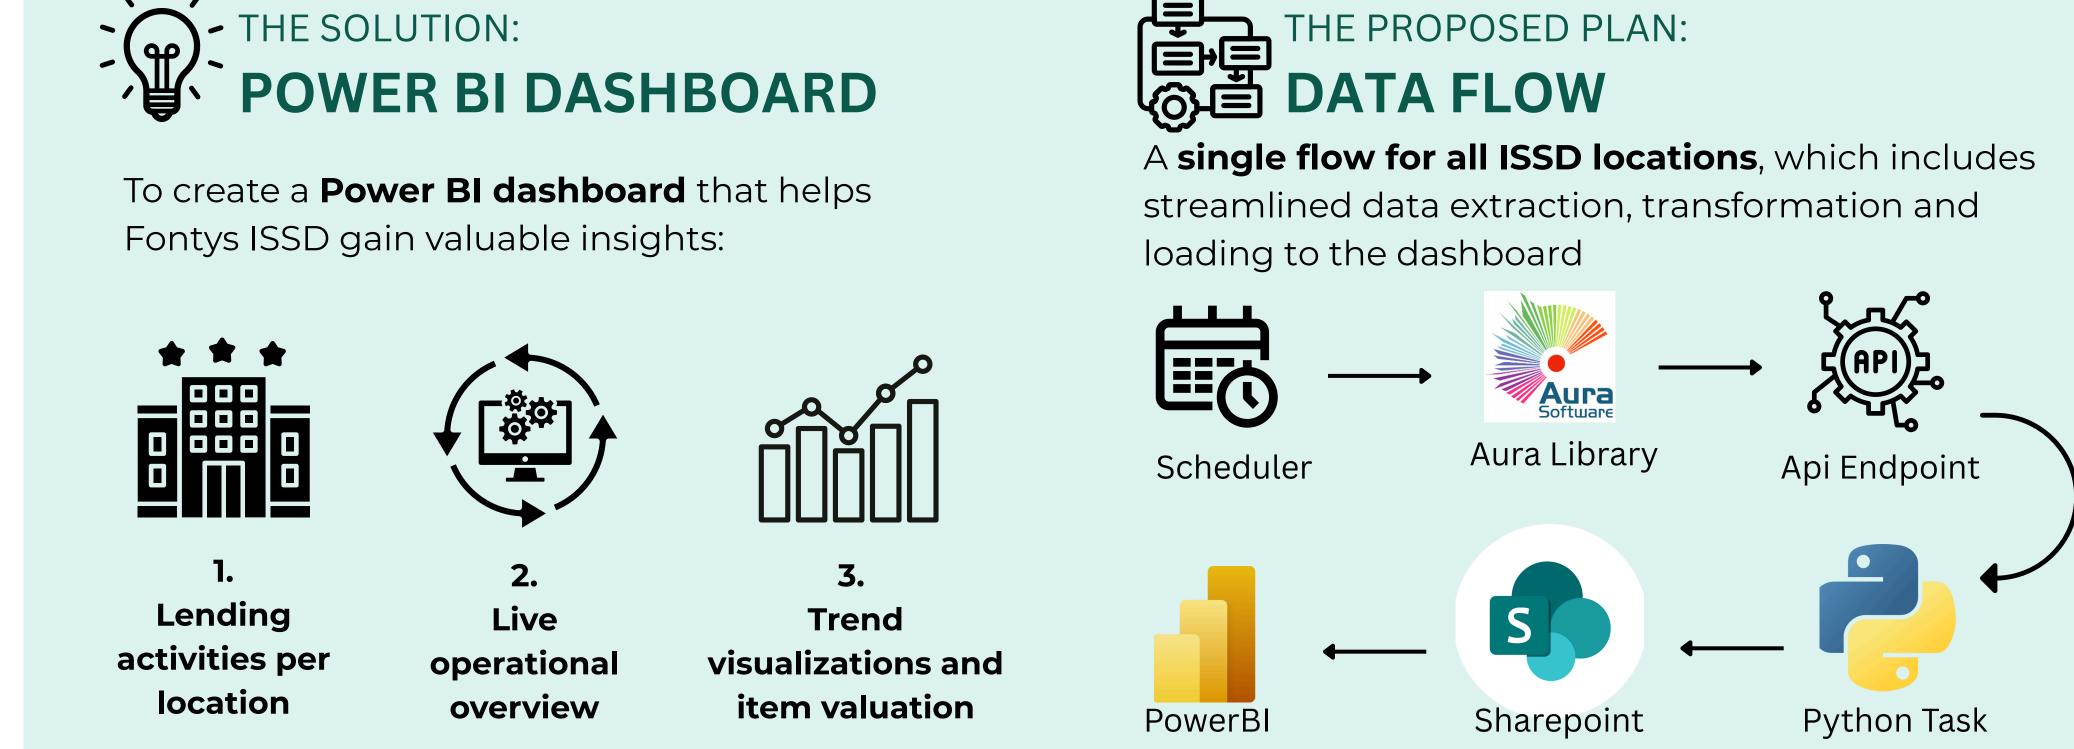

AURA LIBRARY

The Aura library is being used to keep track of all the items lent, in stock, and available. This system lacks:

- No clear feedback of ongoing activities
- No borrowing behavior insights.
- No daily or live operational overview.
- No separation in data **according to the location**.
- No trend analysis or forecasting.

Deliver actionable insights from the Aura Library data to improve efficiency and decision-making throughout all locations of the ISSD.

PROJECT DEVELOPMENT:

DASHBOARDS PROTOTYPE

Allows users to **visualize insights** on:

- General Statistics
- Trends & Historical Analysis
- Popular & Inactive Items
- Customer Behavior and
- Problem Areas
